Experience

System Architect & Support Specialist KeenThemes (Remote) 2022 - Present

- Co-developer for Metronic v9 (React v19, Tailwind v4), delivering 150+ pages and 60+ components for the #1 dashboard template on ThemeForest with 117,000+ sales and 4.89/5 rating
- Architect and maintainer of backend systems, APIs, and server infrastructure powering the entire keenthemes.com ecosystem (Laravel 12, Docker, Traefik)
- Co-developer and maintainer of KTUI (35 components, 290+ examples, 712 tests) and ReUI (3,100+ GitHub stars, 1,000+ UI patterns), open-source UI libraries for modern web apps
- Technical support specialist for 118,000+ developers worldwide in the devs.keenthemes.com forum, handling 6,457+ support questions across 14 frameworks

Senior Software Developer KeenThemes (Remote) 2019 - 2022

- Built Metronic v6 (Bootstrap 4 + jQuery) and Metronic v8 (React + TypeScript)
- Created 150+ pages and 60+ reusable components for enterprise applications
- Improved developer experience with modern UI/UX patterns and component libraries

Software Developer (Freelancer) KeenThemes 2015 - 2019

- Started with Metronic v4 development, building the foundation of what would become the #1 dashboard template
- Built responsive layouts and interactive components for enterprise dashboards
- Established coding standards and documentation practices
- Contributed to the first 1,000+ positive reviews and 4.5+ rating

Notable Projects
